INTRODUCTION

Full Spec Group (FSG) is a leading construction service company, with diverse capabilities, backed by an experienced and passionate team. We offer a range of professional Remediation & waterproofing services to residential, commercial, and industrial clients across multiple sectors throughout NSW.

Since its inception FSG has earned an enviable reputation for quality and service, in large part, due to the dedication and hard work of our employees. Our team have the necessary skills, experience, and can-do attitude that gets the job done.

We are committed to continuing to deliver construction services of the highest quality, to complete each project within the agreed timeframe and to the total satisfaction of the client.

Central to the founding Directors' Our vision is to ensure we remain strategically positioned to support our customers with end-to-end solutions and services in all the markets in which they operate. To this end, we continually seek to extend our reach and expand our services, offering customers value-added capabilities that complement our core activities. Combined we have over 30 years of industry experience.

MISSION STATEMENT

Our Purpose is to supply a service like no other to our clients in the residential, commercial and industrial sectors.

Our Mission is to become the number one remediation and waterproofing provider in NSW.

Our Values We focus on the client's inquiry and action with integrity and enterprise.

We innovate and constantly improve.

We respond quickly.

We do what we say we will do.

We practice open and honest communication.

Level 2 65-71 Belmore Road, Randwick

Construction Statistics

At Full Spec Group, we understand that every project we work on is someone's investment, whether it is a residential, commercial or industrial project. There is a statistic often quoted in the building industry: waterproofing is 1.8% of construction cost but accounts for 83% of building defect complaints. When you contact Full Spec to undertake your building's waterproofing in Sydney then, you are guaranteed not to become a statistic.

SPECIALIST SERVICES

Rising dampness is often the cause of structural damage in buildings. The internally rising groundwater saturates walls and pollutants, such as saltpetre, which are contained in the water, can damage building materials. With time constant dampness in walls can lead to mould, blistering, the peeling of paint and wallpaper, and damaged render

We offer three Solutions to rising damp.

- **Negative Membrane (invasive)**
- **Injection Water stop (invasive)**
- **Renodry Technology (non-invasive)**

Residential | Commerical | industrial
